May 2022 - September 2022 (Remote)

[Pesto](#) – *Senior Software Engineer*

Worked on Pesto 2.0 featuring more engaging meetings with support for Widgets such as Timers, Meeting Notes, etc. Used **React.js**, **GraphQL**, **WebRTC**, **PostgreSQL**, **Typescript**, etc. Company shut down in September 2022.

June 2021 - May 2022 (Remote)

[Shiphero](#) – *Senior Software Engineer*

Developing improvements to the application and periodically rotating to on call shifts to debug and fix bugs. Using **Python** with **GraphQL** using **Graphene**, and **React Native/Typescript**.

April 2020 - April 2021 (Guadalajara, México)

[GoExpedi](#) – *Engineering Manager*

Managed 10+ engineers and an Engineering Manager. Responsible for **product delivery**, **process ceremonies and continuous improvement** of the overall team. Introduced a Continuous Delivery culture within the team. **Python & Javascript** mainly.

December 2018 - March 2020 (Guadalajara, México)

[Rever Inc - Backed by Sequoia](#) – *Senior Product Engineer*

Focused on Software Architecture and defined our interview processes (defining interview questions/metrics). My responsibilities were to make our Front and Back end teams deliver quality code with Code Reviews, Technical Specification documents, Pair Programming and workshops for Software Design and Testing. Worked with **Node.js**, **Python**, **MongoDB** and **PostgreSQL**.

April 2018 - December 2018 (Guadalajara, México)

[100 Ladrillos](#) – *Software Engineer*

I lived the hand-off of our first MVP developed by outsourcing. With the team, we did some analysis and improvements to the software, including more tests, improving software design, and kept growing the platform. Worked with **Ruby on Rails**, **Sinatra** and **Node.js**

October 2016 - April 2018 (Guadalajara, México)

[Wizeline](#) – *Software Engineer*

Developed a Wizeline Chatbots Platform, a product to build and deploy custom chatbots able to handle multiple messaging platforms such as Facebook, Microsoft Webchat, Intercom, and others. Applied some of the concepts of **Domain Driven Design** and **Clean Architecture**, and helped the team to have a more Test-Oriented culture by promoting the use of **Test Driven Development**.

January 2016 - September 2016 (Guadalajara, México)

[VoxFeed](#) – *Software Engineer (React/Node.js)*
